

Jeffrey Ziplow

MBA, CISA, CGEIT

As a partner at blum, Jeff is responsible for the firm's Risk Management and Process/Controls practices areas. He has significant experience working with organizations to assess their internal IT controls as they relate to business operations and helps to develop recommendations to mitigate risk.

Jeff oversees the firm's cybersecurity risk assessments and provides insight and guidance on developing better security practices. He also works with Connecticut's Office of the Attorney General to provide guidance/support on cybersecurity matters.

Jeff also oversees various IT related audits based on the AICPA's SSAE-18 (SOC-1) and AT-101 (SOC-2) compliance standards as well as working with the NIST based standards. In addition, he works on Process and Control related projects to enhance operational efficiencies and provide tangible control recommendations.

Over the past several years, Jeff has been actively involved in providing cybersecurity and risk assessments presentations to a wide variety of companies to enhance thought leadership in these areas.

Each client is unique, and having face-to-face discussions to better understand a client's challenges, along with their business personality, is my personal approach to client service.
